

Immunology Class Preparation

1. Label each example as either active or passive immunity:
 - a. Antibodies are passed from the mother to the fetus: _____Passive immunity_____
 - b. Antibodies are produced after exposure to a killed virus: _____Active immunity_____
 - c. Antibodies are produced after an infection: _____Active immunity_____
 - d. Antibodies are administered in the form of immune globulins: _____Passive immunity_____
2. A nurse is assessing a client for HIV. The nurse should identify which of the following risk factors associated with this virus? Select all that apply.
 - a. Perinatal exposure
 - b. Monogamous partner
 - c. Blood transfusion
 - d. Occupational exposure
3. A nurse in an outpatient clinic is assessing a client who reports night sweats, fatigue, cough, nausea, diarrhea and has a temperature of 38.1° C (100.6° F). The client is concerned about the possibility of having HIV. Which actions should the nurse take? Select all that apply.
 - a. Perform a physical assessment
 - b. Determine when the manifestations began
 - c. Request a prescription for an antibiotic
 - d. Request a prescription for HIV testing
 - e. Obtain a sexual history
4. List three effects of aging on the immune system:
 - a. _Decreased production of T cells _
 - b. _Reduced effectiveness of B cells_
 - c. _Slower immune response to new antigens_
5. Match the type of hypersensitivity reaction to the characteristics:

Type I: IgE-Mediated __A__	A. Caused by pollen, food, drugs, dust, immediate reaction, allergic rhinitis, atopic dermatitis, skin test shows wheal and flare
Type II: Cytotoxic __C__	B. Occurs when T cells attack antigens or release cytokines, several days to occur, contact dermatitis
Type III: Immune- Complex __D__	C. Caused by ABO incompatibility blood transfusion reaction, occurs in minutes to hours, activates
Type IV: Delayed Hypersensitivity __B__	D. Caused by fungal, viral, or bacterial antigens, takes hours to days to develop, rheumatoid arthritis, systemic lupus erythematosus, complement system and leads to cell lysis and acute kidney injury
