Infection Control Class Prep 10/11/24

Danni Alfree

You will be required to complete the lesson on ATI, “Chain of Infection & Body Defenses.” You will complete the lesson (No need to print anything) and on this handout, write the proper order for the Chain of infection, an example of each of the components of the chain of infection, 3 nursing interventions and the rationale for doing them to protect against infections. Please submit this assignment electronically to Mrs. Wingate’s dropbox labeled, “Infection Control” **by 0830 on 10/11/24.**

******To access the assignment on ATI, follow these instructions: Log on to ATI, Go to the tab, “My ATI”, then look for the module, “Engage Fundamentals RN.” Click it and look for “Foundations of Nursing Practice” tab and click it. Next will be, “Infection Control & Isolation, then choose the lesson to the left called, “Chain of Infections & Body Defenses.”

For additional Learning: Fundamental Takeaways: Infection Control /Isolation Flashcards. (Optional)

Proper order of the Chain of Infection with an example of each:

1. infectious agent- staphylococcus aureus
2. reservoir- bed
3. portal of exit- wound drainage
4. mode of transmission- direct contact
5. portal of entry- mouth
6. susceptible host- client with suppressed immune system

3 Nursing Interventions w/ Rationales:

1. wear a mask to prevent droplet transmission when working with droplets
precaution clients
