Infection Control Class Prep 10/11/24

You will be required to complete the lesson on ATI, “Chain of Infection & Body Defenses.” You will complete the lesson (No need to print anything) and on this handout, write the proper order for the Chain of infection, an example of each of the components of the chain of infection, 3 nursing interventions and the rationale for doing them to protect against infections. Please submit this assignment electronically to Mrs. Wingate’s dropbox labeled, “Infection Control” **by 0830 on 10/11/24.**

******To access the assignment on ATI, follow these instructions: Log on to ATI, Go to the tab, “My ATI”, then look for the module, “Engage Fundamentals RN.” Click it and look for “Foundations of Nursing Practice” tab and click it. Next will be, “Infection Control & Isolation, then choose the lesson to the left called, “Chain of Infections & Body Defenses.”

For additional Learning: Fundamental Takeaways: Infection Control /Isolation Flashcards. (Optional)

Proper order of the Chain of Infection with an example of each:

1. Infectious Agent (c.diff)
2. Reservoir (table)
3. Portal of entry (wound drainage)
4. Mode of transmission (contact)
5. Portal of entry (mouth)
6. Susceptible host (client with suppressed immune system)

3 Nursing Interventions w/ Rationales:

1. Wearing gloves everytime there is an opportunity to encounter bodily fluids or open wounds to prevent infectious direct contact transmission.

2. Providing oral care BID or PRN (dry mouth) to ensure that mucous membranes are moist and pink to protect them from cracking.
3. Turning an immobile patient Q 2 hours to prevent pressure injuries and the risk of infection through an open wound.
