**Unit 1 Part 1 – Day 1 Class Preparation Assignment**

Watch the 2 Sepsis videos below and answer the following questions. Please submit to Mrs. Hesel's Dropbox by **Tuesday 2/4/25 @ 0830**.

**“It’s Sepsis and You Know It”**

<https://youtu.be/cGZcJ-z7GbA>

1. What symptoms brought the client to the emergency room?

**His daughter reported that he was really warm, he was breathing fast and he had low urine output.**

2. Name 2 medications mentioned in the video that are used to treat sepsis.

**Zosyn and Levophed**

3. List 5 assessments mentioned in the video that suggest poor tissue perfusion.

**Tachycardia, Tachypnea, Decreased LOC, decreased urine output, low BP, and a Temperature of 35 degrees Celsius.**

4. Name 2 reasons why a central line would be indicated to treat this patient.

**A central line would be indicated because it allows for rapid Administration of medication. It is also important for hemodynamic monitoring.**

**“Sepsy Back”**

<https://youtu.be/2WPnP1YBCD8>

5. Fill in the blank: According to the video, “early identification and treatment of sepsis will **Save Lives** “

6. What symptoms did the patient have that met SIRS criteria?

**Cyanosis, tachycardia, temperature 102 degrees Fahrenheit, and left shift.**

7. Name 3 common sources of sepsis and the corresponding diagnostic studies that were ordered

**Cultures x2 for bacteremia, UA, Xray for pneumonia.**

8. In the video, how much IV fluid was given before pressors were started?

**4 Liter bolus**

9. What is “Vosyn” and why is it used to treat sepsis?

**Vosyn is an antibiotic that is vanc and zosyn mixed together. It is used to treat sepsis because it is a broad-spectrum antibiotic.**
