Unit 1 Part 1 – Day 1 Class Preparation Assignment

Watch the 2 Sepsis videos below and answer the following questions. Please submit to Mrs. Helsel's Dropbox by **Tuesday 2/4/25 @ 0830**.

“It’s Sepsis and You Know It”

<https://youtu.be/cGZcJ-z7GbA>

1. What symptoms brought the client to the emergency room?
fast breathing, fever, dark colored urine, tachycardia, decreased LOC
2. Name 2 medications mentioned in the video that are used to treat sepsis.
Zosyn and Insulin
3. List 5 assessments mentioned in the video that suggest poor tissue perfusion.
Hypotension, decreased LOC, High Lactate, Respiratory distress, Oliguria
4. Name 2 reasons why a central line would be indicated to treat this patient.
To give large volume of fluids and to give meds to maintain adequate BP. (also lactate and cvp monitoring)

“Sepsy Back”

<https://youtu.be/2WPnP1YBCD8>

5. Fill in the blank: According to the video, “early identification and treatment of sepsis will save lives”
6. What symptoms did the patient have that met SIRS criteria?
Cyanosis, Temp 102 or higher, tachycardia
7. Name 3 common sources of sepsis and the corresponding diagnostic studies that were ordered
UA for Bacteriuria Chest X Ray for Pneumonia Blood cultures for Bacteremia
8. In the video, how much IV fluid was given before pressors were started?
4 Liter Bolus
9. What is “Vosyn” and why is it used to treat sepsis?
Vancomycin and Zosyn because it covers the range positive and negative bacteria for treatment
