

A= Process that requires energy to move a substance across a cell membrane

B= No urine formation

C= Movements of solutes from higher to lower concentrations

D= Painful urination

E= Incontinence during sleep

F= Large amounts of urine output

G= blood in the urine

H= Difficulty starting urine stream

I= Urination

J= Frequent urination at night

K= Scanty urine output

L= Urine containing gas

M= voiding occurs more often than usual

N= backward flow of urine

O= inability to void

P= can be caused by sneezing

Q= Strong desire to urinate

1. Match the terms with the descriptions:

- | | |
|------------------------|---|
| a. active transport | _____ backward flow of urine |
| b. anuria | _____ blood in the urine |
| c. diffusion | _____ scanty urine output |
| d. dysuria | _____ can be caused by sneezing |
| e. enuresis | _____ urine containing gas |
| f. frequency | _____ incontinence during sleep |
| g. hematuria | _____ painful urination |
| h. hesitancy | _____ no urine formation |
| i. micturition | _____ frequent urination at night |
| j. nocturia | _____ inability to void |
| k. oliguria | _____ large amount of urine output |
| l. pneumaturia | _____ difficulty starting urine stream |
| m. polyuria | _____ strong desire to urinate |
| n. reflux | _____ urination |
| o. retention | _____ movement of solutes from higher to lower concentration |
| p. stress incontinence | _____ process that requires energy to move a substance across a cell membrane |
| q. urgency | _____ voiding occurs more often than usual |
