

N202 Unit VI Part 2

Class Preparation Assignment – Community Health Case Study

Maria's Story

Maria is a 32-year-old immigrant woman who recently moved to your community with her two young children. She is a single mother who works part-time at a local restaurant and struggles to make ends meet. Maria does not speak English fluently and often finds it difficult to navigate healthcare services. She has been experiencing symptoms of depression, including persistent sadness and trouble sleeping. Maria also shares that she has trouble affording healthy food and has not been able to see a doctor for a check-up in over a year. Her children are often sick, and she is concerned about their health but doesn't know where to turn for help.

Questions:

- 1. What are Maria's current healthcare needs?**

Assess to healthy foods, help with depression and insomnia, and provide resources to help ensure adequate healthcare

- 2. Describe two barriers to healthcare that Maria is encountering and how they may impact her. The language barrier means that she is not receiving the needed information in a clear way that is easy to understand for her. This allows for a lot of loss in communication. Financial issues impact her by not allowing her to have enough money to afford the cost of routine doctor visits.**
- 3. As a nurse in the community, identify at least one intervention you would recommend to address Maria's situation.**

One intervention that I would recommend is a translator in order to communicate the information in its entirety without missing any key concepts.

- 4. How would you ensure that you are providing culturally competent nursing care to Maria and her family?**
Assess her cultural beliefs and respect their beliefs and values for what can be done and what can not be done.
