

Heart Failure Review

Instructions: Complete the diagram by labeling each symptom appropriately to either right or left sided heart failure

Fatigue	Orthopnea	GI Distress/Anorexia	Confusion
Cyanosis	Distended Jugular Veins	Ascites	Weight gain
Enlarged liver & spleen	Tachypnea	Paroxysmal Nocturnal Dyspnea	Crackles/Wheezes
Restlessness	Dependent edema	↑ peripheral venous pressure	Exertional dyspnea
↑ pulm cap wedge pressure	Cough	Blood tinged sputum	May be caused by chronic pulm problems

Left Side: orthopnea, paroxysmal nocturnal dyspnea, exertional dyspnea, tachypnea, crackles/wheezing, cough, blood tinged sputum, cyanosis, increased pulm cap wedge pressure, restlessness, confusion, fatigue,

Right Side: JVD, dependent edema, ascites, weight gain, enlarged liver and spleen, increased peripheral venous pressure, GI distress/anorexia

Label the coronary arteries on the diagram below. For the bolded arteries, state what portion of the heart they feed.

- **Left Anterior Descending (LAD)**
- **Right Coronary Artery**
- Left Coronary Artery
- **Left Circumflex**
- Aorta
