

Refined list

Societal resistance to technological improvements in the face of Global Hunger.

- a. What hazards from food technology have been measured?
- b. What percentage of consumers are concerned about technology enhanced foods?
- c. What percentage of concerned consumers actually change their purchasing/eating habits as a result?
- d. How does Socio-Economic status relate to anti-technology concerns/behaviors?
- e. What are the concerns that society has about food technology?
- f. Are steps being taken to address these consumer concerns?

How? How can Agriculture overcome this problem?	Who? What groups of people have the most trouble with TI-foods?	What? What are the major concerns/issues they have?
----------------------------------------------------------	--------------------------------------------------------------------------	--------------------------------------------------------------

Societal resistance to technological improvements in the face of Global Hunger.

When? How long has this been an issue/when did it start?	Where? Are there concentrations/locatio ns where this is greater?	Why? Why are these concerns coming to light now?
-------------------------------------------------------------------	-------------------------------------------------------------------------------	-----------------------------------------------------------

Conclusion

1. How does brainstorming help determine an area of interest?
Brainstorming helps refine the question and allows others to participate/bring new ideas.
2. What questions were most helpful in narrowing your interest to one topic?
The who and why were particularly helpful for this topic.
3. What is the problem you have chosen to study in this course?

Activity 2.1.2 Brainstorming

2017 ARD CI Kaltenbach/Biegel

Societal resistance to technological improvements in the face of Global Hunger.
