Presentation Notes

Presentation Safety is an Attitude

Lesson 3.1

Notes from Presentation:

Safety – free from accidents, act responsible

The attitude of Safety – Positive Attitude, willingness to try new things, read and follow all procedures, clean up according to instructions, care for self.. others.. and property

PPE – Safety glasses, lab apron, disposable gloves. Protects from injury and illness, wear when working with chemicals, heat, and moving mechanisms.

Working with hazardous materials – Glass, Chemicals, Fire, Tools. Use as instructed.

Accidents - report accidents to instructor, clean up properly, do not dispose without instruction

Safety colors – indicators, specific message, Red... Danger. Orange... Warning. Yellow... Caution. Blue...

Information. Green... Safety Equipment. White... Traffic Markings. White & Black Stripes... Stop traffic. Gray... Work area.

Safety Concerns – Fire, Electrocution, Bodily Injury.

Fire Components – fuel, heat, oxygen.

Preventing Fires – remove a component, safe surrounding, store all materials properly.

AFNR Reflection Page

List five key points that are important to remember from this presentation.

1. It is very important to pay attention in labs.
2. Pay attention to the Safety colors.
3. Be aware of safety concerns.
4. Be sure to use protective gear when needed.
5. Use hazardous materials as instructed.

List three ideas or concepts that this new information has in common with previous things learned.

1. Always report accidents to instructor, so that the incident doesn't become harmful.
2. PPE is important when doing a lab to protect yourself from getting injured.
3. Green means safety equipment.

List questions or ideas that remain unclear about the information presented that should be asked for clarity at the appropriate time.
