

Meat Consumption and Animal By-Products

Lauren Sylvester and Lizzy Niehaus

- **What are two positive and negative effects of your issue on animal agriculture?:**

Positive: food and clothing

Negative: killing animals and wasting parts of the animals

- **What common misconceptions are there about the use of this practice?:**

Killing the animals, using them for human benefits, and people say/think animals should be treated like human.

- **Have you found any reports of abuse or cruelty related to this issue?:**

Yes, some people don't treat animals correctly in the process of meat production.

- **What might happen if this practice is stopped?:**

We would run out of the material we need and get from animals, such as clothing and food. Meat is a big source of protein, no matter how much people disagree.
