

## Presentation Notes

Presentation Watercycle

Lesson 4.3

Notes from Presentation:

Water covers 70% of Earth.

Sustains life processes

Used for many purposes

Atmosphere

In lake rivers streams and oceans.

Groundwater

Organisms

Melting- changing from solid to liquid.

Freezing- changing from a liquid to a solid.

Evaporation- change from liquid to gas.

Condensation- change from gas to liquid.

Transpiration- water vapor produced by plants.

Percolation and Infiltration- movement of water through Earth materials.

# AFNR Reflection Page

List five key points that are important to remember from this presentation.

1. Water Cycle is crucial to life on Earth.
2. Water is everywhere on Earth
3. Used for many purposes
4. Water has many forms
5. Water is in the atmosphere

List three ideas or concepts that this new information has in common with previous things learned.

1. Transpiration
2. Infiltration
3. Groundwater

List questions or ideas that remain unclear about the information presented that should be asked for clarity at the appropriate time.

I have no questions.
