

Presentation Notes

Presentation H2O Cycle Notes

Lesson 4.3

Notes from Presentation:

Importance of water

- Covers 70% of earth
- Sustains all life processes
- Used for many purposes
 - Agriculture
 - Industry and processing
 - Hydroelectric plants
 - Fish and wildlife
 - Recreation
 - Domestic use

Water location

- Atmosphere
- Precipitation
- Organisms
- Earth's surface
- Groundwater

Water Changing Processes

- Melting- change from solid to liquid
- Freezing- Changes from liquid to solid
- Evaporation- Changes from liquid to gas
- Condensation- Change from gas to liquid
- Transpiration- Water vapor produced by plants
- Percolation and Infiltration- movement of water through earth materials

AFNR Reflection Page

List five key points that are important to remember from this presentation.

1. The locations of where water is located
2. The parts in the water changing process
3. What each part means in the water changing process
4. Uses of water
5. Importance of water

List three ideas or concepts that this new information has in common with previous things learned.

1. Evaporation is when water is a gas and changes into a liquid.
2. Water is used for fish and wildlife.
3. Water is located in the atmosphere as a gas.

List questions or ideas that remain unclear about the information presented that should be asked for clarity at the appropriate time.
