

Water story

Water travels in the ecosystem. Water can travel in the Atmosphere, Precipitation, ground water, surface, and in organisms. Three different forms water can be is liquid, gas, and turbidity

Vapor. *Day 1:* I'm leaving home today, I'm going to take the wind train that's high in the Atmosphere. I couldn't believe it, as I look out the window I can see my home getting farther and farther away and I can't believe that I turned into vapor.

Precipitation. *Day 3:* I got off the wind train today and it dropped me off at the raindrop station then I found someone I knew and we went to a party right above Strawberry Creek and by the end of the day I turned into precipitation.

Liquid. *Day 8:* I rained down and when I came out of the river as a liquid and I got filtered through a cave that led to a hole with a bucket next to me. I heard terrible things about being a part of the groundwater, and I just hope that the legends aren't true.

Liquid. *Day 13:* Today I was pumped out of the well at an orchard and the legends are true there really are god's (people) that can carry us anywhere they wish then me and the other's that I was with got separated by a cup and they were dunked by a god himself which i heard was called a sacrifice and that's why only adults can explore from the mountains. Then the rest of the group including me was placed in a bird bath and now I was part of the surface I still hasn't changed into anything, so I'm still a liquid.

Liquid. *Day 14:* A bird took a bath in me today and I got stuck on one of her feathers then she flew off and it took 20 minutes to get free from her and as I was falling I was so scared that I would never see my family again. When I landed I was starting to be processed through a tree root still as a drop. Still not believing that I was just in a backyard.

Liquid. *Day 16:* A mosquito came and drank me and it spat me out in an animal. Then an E.coli cell swallowed me and I was reunited with my best friend too.
