Class: AFNR
SAE Project
Date: 10/5/20

List 4 potential SAE projects that you *could* complete, including the one you want to complete. Put stars next to the one you want to complete. Be sure to include the system.

1. Placement: my house

2. Entrepreneurship: Create a business to grow and sell flowers at a farm market. grow vegetables and sell them at farmers markets

3. Research/Experimentation: Conduct an experiment to determine which is the best fertilizer to use when growing daffodils. My research is to monitor the plants and see how they grow and i can experiment by growing some in dirt and some with hydroponic.

4. Ag Service-Learning: Organize community clean-up activities for public parks and roadways.

i can get poles from the community on what they would like to see the next year

AFNR
SAE Project
Due date: 10/5/20

Create SMART goals for your project. They must include a date, and those dates must be spread out through the semester.

SAE Project: Placement- Developing a vegetable garden for my mom.

Goal #1: Measure the backyard and develop a list of vegetables to plant in the garden by October 15th, 2019.

Order and plant the plants

Goal #2: Research the vegetables to be planted. Indicate the time they should be planted, water requirements, and light and temperature requirements by December 1

I planted strawberries recently and hope to sell them sooner to get some before it gets to cold.
and as im selling i would get intell on what people would want in terms of veggies.

- st, 2019.

Goal #3: Plot the vegetable garden on paper by January 15th, 2020. Set 1-2 hours to draw the vegetable garden including the size of the plot, what vegetables to grow in the plot and location, and when to start the planting process.
my last goal is i hope to gain some money and also have a strong healthy farm.
