

# BOXERS

**Daryan Smith**

# PROVISIONS FOR FEED, WATER, AND HABITAT

## Food-

- When a boxer is 4-8 weeks old they require non manufactured food. (even a homemade meal works)
- 8 weeks-6 months old puppy should be introduced to solid, food. (having set meals helps with housebreaking also)

## Water-

- The amount of water a puppy needs vary on their activity level, age, and the weather.

## Habitat-

- Need room to roam about and to play.
- Can adapt to almost any type of weather conditions and housing editions.

# HEALTH CARE FOR A BOXER

- Boxers do not require a lot of grooming at all.
- Boxers do require exercise so they stay happy and healthy.
- Boxers need good diets, fresh water, and regular vet checkups.
-

# HANDLING PROCEDURES

- You need to start as soon as you get the dog to start training.
- Obedience training is most needed.
- Need to fix your dogs old habits by not letting her or him get into by taking control.

# TRANSPORTATIONS OR HARVESTING PRACTICES

- Boxers are not very good dogs for harvesting purposes.
