

SEEK & FIND: WOUND

Student Name Adria Marcoux Date 10/04/2020

Instructor Signature _____ Student's earned points _____/20

For each item in column A, select two different and appropriate **topical therapies**. If you choose a primary dressing that also requires a secondary dressing, be sure to identify the secondary dressing type as well in order to receive full points. This pairing (a primary with a secondary dressing) would be considered one answer. Identify each type of dressing used by category and brand name.

Answer questions in column B.

Submit to your dropbox when finished.

Use the product name & NOT the product number when completing this assignment.

Column A	Possible Points	Earned Points	Column B	Possible Points	Earned Points
Topical therapy: Category and brand name of specific product(s) to be used Example: Foam; Restore Foam with adhesive border, 4" x 4"					
Wounds with small amounts of drainage. 1. <u>McKesson – Light hydro-cellular foam, silicone adhesive border</u> 2. <u>Mepilex foam dressing with silicone gentle border</u>	0.5		Any special cautions when using the chosen products? When using these dressings on wounds with drainage, peri-wound skin maceration is a condition you should monitor.	0.5	
Sacral wound covered with intact eschar. 1. <u>Smith & Nephew Santyl Collagenase, with scoring of the eschar, covered with</u>	1		Would you change your topical therapy choice if the wound presented as boggy, odorous, draining thick exudate with a 2 cm. area of erythema surrounding the	2
