Ostomy assessment

Peristomal skin assessment

Pouching selection

Peristomal skin management

13. Continence skills completed today; check all that apply:

None

14. Comments

Sara continues to be willing and enthusiastic about rolling up her sleeves and participating in patient care. She is doing a nice job learning patient education on stoma care and is developing her own style.

She has participated in wound care and has demonstrated ability to identify appropriate alternatives for wounds. She's participated in Braden score audits and learned how to initiate order sets to help prevent PIs.

Besides the skills listed above, Sara was educated on and observed colostomy irrigation.

Sara continues to be pleasant and compassionate with patients and is quite collegial with her colleagues. It is a pleasure to have such an eager student and extremely competent RN.
