

Cleveland Clinic
WOC Nursing Education/ Comprehensive WOC Plan of Care/ 50 points
This is the Capstone Project for the full-scope WOC Nurse

Name: _____

Date: _____

Content		Possible Points	Awarded Points	Comments
Summary of Selected Patient	Summarizes pertinent medical and surgical history	2		
Assessment	Using the Braden scale, assess for pressure injury risk. You must submit your completed Braden risk assessment with your care plan.	5		
	Describe assessment findings from skin, wound, ostomy, and/or continence concerns	6		
	List current products and interventions addressing WOC needs	6		
Planning	Formulate a comprehensive management plan based on WOC needs and on specific Braden sub-scale scores	12		
	Propose alternative products. Include generic & brand names	4		
Evaluation	Design plan of care evaluation parameters that demonstrate the desired outcomes (i.e. how do you know your plan of care is working?)	6		
Rationale	Explain the rationale for identified interventions	6		
Organization of Project & Formatting	Possible points	3		
	Rationales referenced & cited according to APA formatting guidelines			
	Proper grammar & punctuation used			
	References <i>See the course syllabus for specific requirements on references for all assignments.</i>			
	Total Points	3		

Remember, this is your capstone project that demonstrates how you integrate full-scope practice as a WOC specialty nurse. Make sure you select a patient with complex WOC nursing needs. Have you incorporated all the physical, psychosocial, and economic care issues associated with this patient? Did you cover wound, ostomy, and continence care needs? How will you measure successful outcomes?
