Clinical Site Name: Queens Medical Center _____ **Today's clinical hours 3** _____ **Log Date:**

11/23/22

Care Setting: Hospital _____ Ambulatory Care _____ Home Care _____ Other: _____ **Total # of patients seen today: 3**

Age/Sex	Primary Diagnosis	Pertinent History/Physical	WOC management issues	Patient Education Needs	What skill did you learn?
52years	Diagnosis: generalized weakness	Notable for gunshot c/b paraplegia, neurogenic bladder, sacral decubitus wounds, urethrocutaneous fistula, pelvic osteomyelitis, perineum diverting colostomy Is this verbiage directly from the medical record?	Hypogastric colostomy leaks	Pt self manages at home with diaper use secondary to colostomy location in the suprapubic area. Yikes, this must be difficult! So based on the skill in the next column you pouched the stoma?	Using Adapt barrier rings, convex barrier rings and stoma paste to fill and flatten abdominal crevices to accommodate a 2 ¼ inch Convex skin barrier.
