- Wound, Ostomy, and Continence Nurse Society (WOCN)

ADDITIONAL INFORMATION

- Research
 - I am currently working with Serena Group Research Center. Dr. Serena will function as the Sub-Investigator, giving me his valuable experience, considering I have little to no experience with research.

- Mastered Required Thesis: The African American Adult Male Perspective of Asthma. I designed, conducted the study, and assumed all responsibilities in addition to my role as a researcher. The IRB-approved research explored the lived experience of African Americans adult males with asthma using a qualitative phenomenology method. The idea was to generate knowledge by understanding the adult African American males' perspective of asthma. The outcome was to advance minorities' perspectives by understanding the knowledge they possess about their disease process. The study used Kleinman's Explanatory Model of Illness as the theoretical framework. Implications for this study education asthmatics of symptoms of asthma, medications, how to control, exacerbation plans, and the possibility of treatment failure. Optum granted the use of the Asthma Control Test (ACT) along with the scoring software.

▪ Future Goals

- Wound, Ostomy, and Continence Certification Advance Practice after the anticipated graduation date of March 31, 2023.
- Foot Care Certification
