

Daily Journal Entry with Plan of Care & Chart NoteStudent Name: Jessica Whelen Day/Date: 7/17/2025Number of Clinical Hours Today: 9Care Setting: Hospital ☐ Ambulatory Care ☒ Home Care ☐ Other ☐Preceptor: S.NormanClinical Focus: Wound ☐ Ostomy ☐ Continence ☒**Reflection: Describe your patient encounters & types of patients seen.**

Today I was in the clinic and shadowed with Jessica/Stephine. Stephine was being trained for a new procedure that day, I spent time with Christine. She had virtual follow up patients. The patient I was able to see were patient's that was having issues with slow transit constipation, another was a follow up from a patient that saw Dr. Spivak last week. Christine shared information about pelvic health. We also had the opportunity to discuss a defecography, how the information is used to diagnose structural and functional problems in the anorectum/pelvic floor that may contribute to fecal incontinence or constipation. We reviewed videofluoroscopy of a patient. It was interesting to watch how stool moves through a normal colon vs a colon that has a deformity like a rectocele. I was present when a patient who had a barbie butt or proctectomy had a wound vac place on his anal area to help wound closure.

high fiber foods, drinking fluids and probiotics. Patient reports use of laxatives. Patient has participated in pelvic floor therapy with some relief. Patient has tried Linzess, with success, however, did she reports experiencing leaking bowels. This has impacted her quality of life with unpredictable bowel movements. Patient became tearful, disclosing who her bowel issues have impacted the relationship with her daughters and her ability to participate as a parent. Patient was provided time to express her emotions, patient's feelings were validated.

The goal of today's visit is to formulate a Plan for a manageable bowel regimen. We discussed large volume enemas. Patient expressed concerned that she will not be able to retain the enema after instillation. We reviewed the steps involved and how to complete the procedure. After explanation of the procedure patient verbalized understanding.

Patient will try this bowl regiment for two month and report back how things are going. Patient is encouraged to continue with pelvic floor therapy, as well as modified diet changes that has been made. Patient has agreed to this plan.

Patient understands to reach out if there are further questions via phone call or My Chart.

WOC Plan of Care (include specific products)

Administer high-volume cleansing enema per rectum twice weekly with 1000 ml of warm tap water or warm water mixed with castile soap via 28 Fr foley catheter, inflate balloon with 10ml of water to retain catheter. Retain fluid for 10-15 minutes.

Describe your thoughts related to the care provided. What would you have done differently?

I feel like I have learned a lot about the gut-brain connection. It is interesting to think that is a correlation between stress and the ability to have a bowel movement. I feel that the patient felt heard and had the sense of light at the end of the tunnel. I find it interesting to see two patients with similar conditions, handling the situation differently. The younger patient from the previous day was ready to move forward with bowel surgery for an ostomy so she could live her life, where here is th

You should have a learning goal for each clinical day. What was your goal for the day? Was it met? Why or why not?

Goals

What was your goal for the day?

(Save the document by clinical date & preceptor last name before submitting to your dropbox each clinical day)

Journals should be submitted to your dropbox no later than **48 hours** following the clinical experience day.

What is/are your learning goal(s) for tomorrow? (Share learning goal with preceptor)

CRITICAL ELEMENTS	Completed	Missing
Medical record note reflects that of a specialist:		
• Identifies why the patient is being seen	✓	
• Describes the encounter including assessment, interactions, any actions, education provided and responses	✓	
• Completes Braden Scale for inpatient encounter	✓	
• Includes pertinent PMH, HPI, current medications and labs	✓	
• Identifies specific products utilized/recommended for use	✓	
• Identifies overall recommendations/plan	✓	
Plan of Care Development:		
• POC is focused and holistic	✓	
• WOC nursing concerns and medical conditions, co-morbidities are incorporated	✓	
• Braden subscales addressed (if pertinent)	✓	
• Statements direct care of the patient in the absence of the WOC nurse	✓	
• Directives are written as nursing orders	✓	
Thoughts Related to Visit:		
• Critical thinking utilized to reflect on patient encounter	✓	
• Identifies alternatives/what would have done differently	✓	
Learning goal identified	✓
