

Intervention Planning Worksheet

Explore/survey your home environment and identify one space/room and three household items that would be appropriate for use in a telehealth ASI intervention session. Provide a brief explanation for your choices. List the sensory properties of the three household items. Post completed assignment on discussion board entitled **Intervention planning**.

Identified space in home for telehealth:

Clinical reasoning for choosing specific space:

Identify 3 ways to ensure safety of space:

Identify 3 household items, list the sensory properties of each and explain how each one could be use in a therapeutic manner:
