

IM 6 CPE and Mock CPE

This information is provided to allow you to prepare for the CPE. The scenarios will include OB and PMH and you will be randomly assigned. Our expectation is that you will come prepared to administer any of the listed medications, perform any of the assessments, and perform any of the procedures or skills listed below. You may bring with you to the CPE the Medication Worksheet for the adult that you have completed using the list of medications below. If the medication may be given by multiple routes, please be prepared to administer any route including IV with correct dilution or rate of administration as it applies. You will use the NII's to prepare for the assessments and procedures listed below. Any additional assessment tools you may need to prepare to use are included in this folder and will have been introduced in class or clinical previously.

Universal Competencies	Resource
Safety & Security Standard Precautions Communication Critical Thinking Documentation Human Caring & Relationship Professional Role Performance	CSON Professional Nursing Skills, Critical Elements and Nursing Intervention Instructions (NII's) pages 4-6
Medication	Route
