

Montgomery School of Nursing Stress and Crisis Debrief – Questions written by J. Wolfe

1. What diagnoses do you feel the patient may have?
2. What are three therapeutic techniques (non-pharmacologic) that the health care team could use?
3. What medications might you consider for this patient? Know the class, the suggested beginning dose, nursing implications, and side effects for each medication.
4. What are your greatest nursing concerns? Assessments? Teaching? Goals for this patient?
