

Patient Name: Wallace Peterson

IM4 Simulation Evaluation

<b>Categories</b>	<b>Exemplar</b>	<b>Opportunities for Improvement</b>
Patient-Centered Care	Introduced self and responded to the patient's question	Communicates patient's preference and needs
Teamwork & Collaboration	Nurses have a good communication to each other as well to the patient.	Verify patient allergy
Evidence Based Practice	Head of bed elevation implemented	Hand sanitation before and after.
Safety	Use of gloves by the nurse was observed and not leaving the rail of the bed down.	Call light on patient reach.
Informatics	Verified vital signs required for administering medication e.g., acetaminophen with a temperature > than 101.3 F	Proper documentation
