Code Blue Online Activity

Charge Nurse/Code Leader Role:
-Will assign clear roles and responsibilities to those involved.
-Give all medical and resuscitative orders.
-Must use "close-looped" communication to direct instructions.

Compression Role:
-Must ensure that compressions are given hard and fast enough to be effective.
-Operate AED.
-There will usually be more than one compressor, and will switch out to prevent fatigue and inadequate compressions.
-Follow up with closed-loop communication after directions are given.

Airway Role:
-Ensure chest rise with respirations.
-Ensure that inhalations are not given too quickly or too forcefully.
-May assist with intubation if necessary.
-Follow up with closed-loop communication after directions are given.

Medication Administration Role:
-Establish IV access.
-Ensure medications are given correctly and in a timely fashion.
-Obtain labs.
-Follow up with closed-loop communication after directions are given.

Scriber Role:
-Must ensure that compressions are given hard and fast enough to be effective.
-Will communicate with the team all interventions that have been completed.
-Document all interventions accurately.
-Follow up with closed-loop communication after directions are given.

Runner Role:
-May get supplies as needed for code team.
-Follow up with closed-loop communication after directions are given.
