

## Covenant School of Nursing Reflective

*Learning to be a reflective practitioner includes not only acquiring knowledge and skills, but also the ability to establish a link between theory and practice, providing a rationale for actions. Reflective practice is the link between theory and practice and a powerful means of using theory to inform practice thus promoting evidence based practice.” (Tsingos et al., 2014)*

Using the Reflective Practice template, document each step. The suggestions in the boxes may help you as you reflect on the incident. This Reflective Practice document will be reviewed by faculty and then you will post the final reflection in your LiveBinder folder.

<p><b>Step 1 Description</b> A description of the incident, with relevant details. Remember to <u>maintain patient confidentiality</u>. Don't make judgments yet or try to draw conclusions; simply describe the events and the key players. Set the scene! It might be useful to ask yourself the following questions</p> <ul style="list-style-type: none"> <li>• What happened?</li> <li>• When did it happen?</li> <li>• Where were you?</li> <li>• Who was involved?</li> <li>• What were you doing?</li> <li>• What role did you play?</li> <li>• What roles did others play?</li> <li>• What was the result?</li> </ul>	<p><b>Step 4 Analysis</b></p> <ul style="list-style-type: none"> <li>• What can you apply to this situation from your previous knowledge, studies or research?</li> <li>• What recent evidence is in the literature surrounding this situation, if any?</li> <li>• Which theories or bodies of knowledge are relevant to the situation – and in what ways?</li> <li>• What broader issues arise from this event?</li> <li>• What sense can you make of the situation?</li> <li>• What was really going on?</li> <li>• Were other people's experiences similar or different in important ways?</li> <li>• What is the impact of different perspectives eg. personnel / patients / colleagues?</li> </ul>
<p><b>Step 2 Feelings</b> Don't move on to analyzing these yet, simply describe them.</p> <ul style="list-style-type: none"> <li>• How were you feeling at the beginning?</li> <li>• What were you thinking at the time?</li> <li>• How did the event make you feel?</li> <li>• What did the words or actions of others make you think?</li> <li>• How did this make you feel?</li> <li>• How did you feel about the final outcome?</li> <li>• What is the most important emotion or feeling you have about the incident?</li> <li>• Why is this the most important feeling?</li> </ul>	<p><b>Step 5 Conclusion</b></p> <ul style="list-style-type: none"> <li>• How could you have made the situation better?</li> <li>• How could others have made the situation better?</li> <li>• What could you have done differently?</li> <li>• What have you learned from this event?</li> </ul>
<p><b>Step 3 Evaluation</b></p> <ul style="list-style-type: none"> <li>• What was good about the event?</li> <li>• What was bad?</li> <li>• What was easy?</li> <li>• What was difficult?</li> <li>• What went well?</li> <li>• What did you do well?</li> <li>• What did others do well?</li> <li>• Did you expect a different outcome? If so, why?</li> <li>• What went wrong, or not as expected? Why?</li> <li>• How did you contribute?</li> </ul>	<p><b>Step 6 Action Plan</b></p> <ul style="list-style-type: none"> <li>• What do you think overall about this situation?</li> <li>• What conclusions can you draw? How do you justify these?</li> <li>• With hindsight, would you do something differently next time and why?</li> <li>• How can you use the lessons learned from this event in future?</li> <li>• Can you apply these learnings to other events?</li> <li>• What has this taught you about professional practice about yourself?</li> <li>• How will you use this experience to further improve your practice in the future?</li> </ul>

## Covenant School of Nursing Reflective

Today my clinical experience was unfortunately online due to COVID-19 protocol. During my clinical experience I got the opportunity to learn about two virtual patients. I think the case studies give the illusion that you are caring for your patients since the questions are typically a critical thinking scenario. This gives students who cannot be in clinical the chance to use the same knowledge we would use in clinical with a patient who was deteriorating quickly or who needed help. I was very pleased with the organization and grace given from the professors when helping me navigate through online clinical. I thought this was a very good alternative to being in person because I still got to learn about patient care and choose the most therapeutic response without feeling like it was busy work to just pass time. Another positive to clinical was having post clinical on teams, I think we were able to talk about our patients in an environment that was comfortable for us and the students who were in clinical got the chance to eat and gather their thoughts before having to recall all the information from the day. I really enjoyed hearing about everyone's day and hearing what good or difficult experiences they had. I think this was another great alternative COVID protocol that could be beneficial even after COVID has calmed down. COVID has brought a lot of challenges during this time and school is no exception. I have been struggling a lot in this module and I was looking forward to having a break from lecture and exams to experience clinical, but like I said previously I think the professors have done an amazing job accommodating students who were unfortunately exposed. Along with adding extra stress to school, COVID has prevented me from seeing my family and friends at times and has caused financial stress. I am not doing as well as I had hoped during this module which adds tons of added stress and anxiety to an already hard time. I have been presently surprised by the support from the teachers in this module, especially compared to previous modules. There have been multiple times that I have felt encouragement and during the time I was waiting for my COVID test results and there were multiple faculty members that reached out to me to ask if I needed anything and how I was feeling. Even though times have been much harder recently, I really appreciated all the kind gestures to make sure that I was feeling better.
