<p>Step 1 Description</p> <p>A pt K⁺ was low & was on K⁺ protocol, which was included giving K⁺ IV & drawing blood to re-evaluate K⁺ level after infusion.</p>	<p>Step 4 Analysis</p> <p>Watching this made me realize how thankful I was for protocols to be in place for situations like this. The nurse knew exactly what to do without any hesitation.</p>
<p>Step 2 Feelings</p> <p>I realized how important it was to get an accurate K⁺ level by waiting 4 hrs after giving the K⁺ infusion. This made me nervous because you do not want to give a pt too much K⁺ because</p>	<p>Step 5 Conclusion</p> <p>Protocols are very important & are there to protect us & the pt. When I get a job I will make sure I am aware of the protocols & procedures of that establishment.</p>
<p>Step 3 Evaluation</p> <p>The nurse I was with handled this very well. After giving the K⁺ she waited the appropriate amount of time. She drew up the blood & sent it to lab.</p>	<p>Step 6 Action Plan</p> <p>This incident went really well because of the protocol set in place. The pts K⁺ was back to normal after the infusion & felt better. I realize how important it is to know the protocols of the place you are working.</p>
