

Focus more on Categories instead of particular medications there are a ton of them.

COPD

Bronchodilators- beta2 adrenergic agonists

Short acting- Albuterol, Ventolin

Long acting Salmeterol (Serevent)

Oral-

Terbutaline (Brethine)

Anti-Inflammatory

Inhaled Glucocorticoids

Pulmicort- Generic Name: budesonide inhalation

Fluticasone propionate (Flovent HFA)

Triamcinolone acetonide (Azmacort)

Glucocorticoid/ beta2 agonist

Advair- generic Name: Fluticasone/salmeterol

Oral Glucocorticoids

Prednisone

Mast Cell Stabilizers

Cromolyn (Intal)

Leukotriene Modifiers

Montelukast (Singulair)

Methylxanthines-

Theophylline

Anticholinergic

Ipratropium (Atrovent)

TB Medications

Isoniazid/INH

Rifampin

Ethambutol

Pyrazinamide

BCG Vaccine

Pneumonia antibiotics

Quinolones-

Ciprofloxacin (Cipro)

Levofloxacin (Levaquin)

Penicillin

Amoxicillin
Piperacillin

Cephalosporin's
Cefazolin
Cephalexin
Cefotetan

Carbapenems
Meropenem

Macrolides
Erythromycin
Azithromycin

Pneumonia vaccine

Decongestants
Phenylephrine
Pseudoephedrine

Topical – ephedrine

Antitussive

Opioid-codeine

Non opioid- dextromethorphan

Expectorants

Guaifenesin (mucinex)
