Carina Tomasini

Code Blue Role Review

Watch the assigned videos and make notes on the following roles during a code scenario.

Team Leader/Charge Nurse:

Lead is physician, or team leader, such has a charge nurse or maybe the primary care nurse for that pt.

Scribe (documentation):

documents arrival, leave, meds times, pretty much whatever has happened or given to the pt.

meds, IV, blood draws, intubation, CPR staA, finish, strips, documents everyone's name that is in room.. X-rays

This person will need to let everyone know when next meds can be given.

Compressor:

staA chest compressions, counts aloud, and needs to speak up if needs to switch with someone before the 2 mins is up.

Medications:

amiodarone, Lidocaine, atropine, ephinephrine

this person needs to make sure given the right amount of meds. also needs to let people when & what is being given and after its given.

Airway management:

usually RT n MD need to be the ones to intubate.
others can keep with bagging pt.

GoFor/Rover: someone that can retreive things not in room or
for some reason not in crash cart.
They can also talk to family members to git
medical hx, or give updates to family

What did you notice that was efficient/well done in the videos?

That they all knew what their roles where and they all felt
confident in those roles.
They had great Communication.
all worked well together as a team

What did you notice that could be improved in the videos?

I would say nothing. It was run very well.
