

Covenant School of Nursing  
Disciplinary Action Summary Assignment  
Instructional Module 2

Student Name: Jada

Date: 12/6/20

DAS Assignment # 1

Name of the defendant: Rachel Baugh Brown

License number of the defendant: 787589

Date action was taken against the license: March 24, 2017

Type of action taken against the license: Revoked

*Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.*

Rachel tested positive for different drugs on multiple occasions and also had alcohol in her system at one point as well.

- 1) First offence was her testing positive for Midazolam and Fentanyl
- 2) While in TPAPN she tested positive for Oxymorphone
- 3) Then she tested positive for a mixture of Amphetamines, Methamphetamines and Ethyl Sulfate and Ethyl Glucuronide which means she was drinking alcohol while in the program (TPAPN)

*Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.*

I think measures that could have taken place would be after her first time failing a drug test would be a suspension and also maybe could have seen an assistance program.

*Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.*

I would notify the charge nurse of my suspicions, and also make sure the patient has been receiving the appropriate care.
