1. What did you like best about your preceptor?

Carley is very good at what she does. She interacts w/ patients very well, has great communication skills, and implements the nursing process in everything she does. She delivers safe patient care and is a great role model. She pushes me to be better everyday by giving me feedback on the things I need to work on. Over all, she is a great nurse and educator.

2. Do you have any suggestions for your preceptor to consider when working with future students?

My only suggestion would be that she quizzes/asks students questions more often to promote critical thinking. (examples: what would you do next? why is this med being given? why is this procedure being done?)
