

# Covenant School of Nursing Reflective

Learning to be a reflective practitioner includes not only acquiring knowledge and skills, but also the ability to establish a link between theory and practice, providing a rationale for actions. Reflective practice is the link between theory and practice and a powerful means of using theory to inform practice thus promoting evidence based practice.” (Tsingos et al., 2014)

Using the Reflective Practice template, document each step. The suggestions in the boxes may help you as you reflect on the incident. This Reflective Practice document will be reviewed by faculty and then you will post the final reflection in your LiveBinder folder.

<p><b>Step 1 Description</b> A description of the incident, with relevant details. Remember to <u>maintain patient confidentiality</u>. Don't make judgments yet or try to draw conclusions; simply describe the events and the key players. Set the scene! It might be useful to ask yourself the following questions</p> <ul style="list-style-type: none"> <li>• What happened?</li> <li>• When did it happen?</li> <li>• Where were you?</li> <li>• Who was involved?</li> <li>• What were you doing?</li> <li>• What role did you play?</li> <li>• What roles did others play?</li> <li>• What was the result?</li> </ul>	<p><b>Step 4 Analysis</b></p> <ul style="list-style-type: none"> <li>• What can you apply to this situation from your previous knowledge, studies or research?</li> <li>• What recent evidence is in the literature surrounding this situation, if any?</li> <li>• Which theories or bodies of knowledge are relevant to the situation – and in what ways?</li> <li>• What broader issues arise from this event?</li> <li>• What sense can you make of the situation?</li> <li>• What was really going on?</li> <li>• Were other people's experiences similar or different in important ways?</li> <li>• What is the impact of different perspectives eg. personal / patients / colleagues?</li> </ul>
<p><b>Step 2 Feelings</b> Don't move on to analyzing these yet, simply describe them.</p> <ul style="list-style-type: none"> <li>• How were you feeling at the beginning?</li> <li>• What were you thinking at the time?</li> <li>• How did the event make you feel?</li> <li>• What did the words or actions of others make you think?</li> <li>• How did this make you feel?</li> <li>• How did you feel about the final outcome?</li> <li>• What is the most important emotion or feeling you have about the incident?</li> <li>• Why is this the most important feeling?</li> </ul>	<p><b>Step 5 Conclusion</b></p> <ul style="list-style-type: none"> <li>• How could you have made the situation better?</li> <li>• How could others have made the situation better?</li> <li>• What could you have done differently?</li> <li>• What have you learned from this event?</li> </ul>
<p><b>Step 3 Evaluation</b></p> <ul style="list-style-type: none"> <li>• What was good about the event?</li> <li>• What was bad?</li> <li>• What was easy?</li> <li>• What was difficult?</li> <li>• What went well?</li> <li>• What did you do well?</li> <li>• What did others do well?</li> <li>• Did you expect a different outcome? If so, why?</li> <li>• What went wrong, or not as expected? Why?</li> <li>• How did you contribute?</li> </ul>	<p><b>Step 6 Action Plan</b></p> <ul style="list-style-type: none"> <li>• What do you think overall about this situation?</li> <li>• What conclusions can you draw? How do you justify these?</li> <li>• With hindsight, would you do something differently next time and why?</li> <li>• How can you use the lessons learned from this event in future?</li> <li>• Can you apply these learnings to other events?</li> <li>• What has this taught you about professional practice about yourself?</li> <li>• How will you use this experience to further improve your practice in the future?</li> </ul>

## Covenant School of Nursing Reflective

My time in the SICU at Covenant was full of new experiences and lots of learning. I really enjoyed the floor itself, the nurses, and the patient's that I was able to take care of. A few of the clinical skills that I performed for the first time in the hospital setting was giving an IM injection, removing a foley, drawing blood from an ART line, and performing ET and oral care for patients who were sedated. The ICU is a great place to learn and I feel like I got the most of my time there by being engaged and proactive as a student. I think that the ICU is the floor where I have gotten to perform the most skills and learned to think more critically. I learned about conditions that I have never seen in person before, and I even experienced a few codes and saw the interaction between the healthcare team and my role in that scenario. Although my clinicals in the ICU were extremely educational, I had a couple of hard days as well. The floor was a lot more emotional than I expected, and I saw more pain and heartache than I could have imagined. In my own personal experience, I was involved in withdrawing care from a patient who was critically & chronically ill. It was bittersweet knowing that the patient wasn't going to be hurting anymore, but it was also heartbreaking to see the husband that she left behind so devastated. I feel honored that I was able to be a part of that and hopefully made the patient's way of leaving this world peaceful and the way that she would have wanted it. Overall, I enjoyed my time at the SICU, and I would even consider working on that floor once I am graduated and a nurse myself. I feel as though I am wrapping up my clinical time in Module 7 with way more knowledge than I came in with and a greater appreciation for life and grateful for being able to care for the patients I had and their families.
