

	Safety and Security	Standard Precautions	Communication
Video by CK - CVAD Dressing Gone Awry	She didn't explain to the patient that she would be exposed prior to exposing the patients chest.	She did wash hands prior to entering the room.	Her communication skills are not good at all. Instead of explaining and being professional, she is telling the patient how her day has been crazy.
		She cleared the table but didn't clean it or wipe it down .	She kept saying, "I guess, I can do this for you."
		She touched the patient and once again forgot to clean her hands.	
		She placed sterile gloves on the sterile field	
		she is taking off the dressing with the sterile gloves shat you would use to place the new dressing on.
