Video by CK - CVAD Dressing Gone Awry	did not date, time, initial the dressing after placed, threw the label away.	Did not do hand hygiene at all	did not explain what she was going to do
	opened the sterile kit and closed it again to turn around	did not clean table before placing kit	no patient teaching
	placed gloves on sterile kit that was open and contaminated it	took dressing off away from site instead towards	did not clean clutter till she remembered when she was about to leave the room
	reaching over sterile kit multiple times	did not change gloves between dressing changes kept the same sterile gloves on	
	touched lumens before dressing was on		
	did not cover patient up after procedure was done		
	did not take off mask until she was about to leave the room and almost forgot about it.
