Video by LD - Insulin Administration	Insulin should be drawn up in the med room.	Did not clean med tray out.	Speaks to patient in a very boastful manner, this can come off as uncaring and rude.
	Did not check blood glucose prior to giving insulin	No hand hygiene performed while	
	Gave wrong dosage of insulin, should be 6 units for blood sugar of 260.		
	Did not ask for any allergies.		
	Bed rails need to stay up after leaving room, patient can roll/fall out of bed.		
	Call light needs to placed within reach of patient's reach.

Critical Thinking	Documentation	Human Caring/Relationships	Professional Role Performance
	Did not get insulin co-signed and checked by another nurse.	Mentioning how patient cannot go outside or leave anytime soon is inappropriate.	Did not introduce herself upon entering room.
	Did not verify with eMAR where last insulin shot was given.		
	Someone else documented the medication admin, no one can document for you!!
