

	Safety and Security	Standard Precautions	Communication
Video by LD - Insulin Administration	Did not ask for name & date of birth of patient	Did not do hand hygiene upon entering the medication room	She was demonstrating a noncaring way to the patient by saying how they weren't going to leave the hospital anytime soon
	Left her patient by her self in the room when your not supposed to for their safety purposes	Did not clean her medication drawer	
	Did not do the 4 p's before leaving the room	Kept touching her face after already doing hand hygiene	
	Left the bed rails down before leaving the room putting the patient as risk for falling		
	Communicated in a nonverbally matter		

# Start Unprofessional Practice Video

Critical Thinking	Documentation	Human Caring/Relationships	Professional Role Performance
Did not do the correct amount of insulin as it should be like the protocol	Nurse did not verify correctly the insulin at all and did not verify the amount and incorrectly documented	Got her patients name wrong which is not respectful	Not professional because she did not comply with the policies or agency protocols
Did not inject the insulin in the proper way because she asked her patient where she wanted it but we're supposed to know where to inject	Did not document before she left the room
