Video by LD - Insulin Administration	Draws up too much insulin for blood sugar level, should be 6 units for bs of 260, drew 8	no hand hygiene/gloves when drawing and giving med	very informal and kind of tacky
	puts patient bed rails down before leaving room		does not ADET upon entering room
	does not check emar for where last dose given		
	no inuslin verification before giving		
	gives insulin injection in the deltoid		
	leaves medication unattended in the patient room and leaves room

Critical Thinking	Documentation	Human Caring/Relationships	Professional Role Performance
does not recheck blood sugars when unsure of reading	has 2nd nurse document insulin dose after the fact	not very uplifting/positive when talking to patient about hospital stay	very unorganized, leaves room several times
does not have food available within 15 minutes of giving			complains of lack of help from staff
