Start Unprofessional Practice Video

Critical Thinking	Documentation	Human Caring/Relationships	Professional Role Performance
Should not draw up the medication in the patients room.		Did not care if the patient did not want the music on. Should not have the music on in the first place.	It is against school policy to be on your phone during clinical but especial in the med room.
Did not look up the push rate for the medication and follow that. She just pushed it all in at once.			It was not professional to play music in the patients room.
