# Start Unprofessional Practice Video

Critical Thinking	Documentation	Human Caring/Relationships	Professional Role Performance
nurse does not verify patient's pain level before administering morphine	nurse does not document medication administration, pain, etc. before leaving the room	nurse does not display caring attitude	nurse is on phone while working
nurse does not assess respirations/breathing before administering morphine		nurse turns lights off when leaving patient's room without asking	nurse is very disorganized during medication administration
			nurse is more interested/focused on her own music than caring for her patient properly
