

IM6 Guided Reflection Questions

Schizophrenia / Invega

1. How would you address the question “What is the benefit to me to use a long-acting antipsychotic medication such as Invega over just taking some pills every day”? Fully explore the potential benefits for the patient.
2. What resources might you be able to provide a patient who is prescribed a long-acting antipsychotic medication such as Invega?
3. What are some possible resources you can provide or direct a patient to if the long-acting medication is not affordable to them?
4. How will the knowledge about the availability of long-acting antipsychotic medication impact your future nursing practice?
5. What areas can you identify that you need improvement on in administering a long-acting antipsychotic medication such as Invega in order to meet the criteria for the CPE? (Now work on that!)
