**Instructional Module 6
Obstetrics Community Clinical Experience**

Community Site: Dr. Dorsett

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed an ultrasound of a patient that they were monitoring for a clinic in Frisco, and a yearly women's health exam.

2. What was the best/most interesting part of the experience?

The clinic was pretty slow, and Dr. Dorsett was out of town, but her nurse practitioner did a really good job of going through each chart with me and explaining exactly what they were doing for their patients. I was thankful that she took the time to do this even though she was really busy with her work in the office.

3. Is a community nursing position something that you would consider working in? Why or why not?

The clinic was a lot more laid back than the hospital setting, so I would consider doing it when I have a family and want to slow down/work less hours.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, I do. However, not everyone in the community who wants to seek infertility treatment can afford. It.

Instructional Module 6
Obstetrics Community Clinical Experience

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I observed patient teaching for a 55 year old woman who was having her yearly woman's health visit. The main thing the nurse practitioner taught on was osteoporosis, nutrition, and getting mammograms. I feel like this was adequate for a women's health visit.
