Instructional Module 6  
Obstetrics Community Clinical Experience

Notes  
on  
Back

Community Site: Brent Nail Office

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

During the day I got to observe and participate in the <sup>yearly</sup> exams ~~annual~~ by handing instruments and swabs to him and being the nurse in the room. I also saw an actual breast exam performed too on all patients.

2. What was the best/most interesting part of the experience?

The most interesting part was getting to see the Pap smears and how the brush picks up cells you can see floating in the specimen cup after I twirled it around. Also I loved getting to see how he was with his patients! He is amazing and so caring + kind.

3. Is a community nursing position something that you would consider working in? Why or why not?

It might be something I consider when I get older but as of right now I like all the action and change that comes with working at the hospital.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes I do! He had everything at his office and even at the Grace campus that anyone could need for their women's health as well as other speciality health needs.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes I did, I saw teaching on Estrogen replacement and also on a hysterectomy. I do think it is adequate considering most of these patients are at the age that they don't have or want to have any more children so hysterectomies and hormone replacement is a good thing to teach on.

I also loved Karen and his medical assistant Riley!  
They were fantastic and very friendly. They made  
me feel welcome and comfortable. Dr. Nall also made  
me feel the same way. He ~~was~~ took the time to teach  
me and answer my questions and didn't get  
frustrated at me for being kinda slower than his  
normal pace which is very different than most doctors  
I have met at school or work. I want to thank  
them for the opportunity and helping me learn  
more about OBGYN and also make me less  
anxious for my first appt with an OB since I'm  
turning 21 😊 Thanks MRS Gurbey + MRS. Neel  
too!
