

Covenant School of Nursing  
Disciplinary Action Summary Assignment  
Instructional Module 2

Student Name: Andrea Barbour Date:4/30/21

DAS Assignment # 1

Name of the defendant: Antonio Rendon III

License number of the defendant: 240896

Date action was taken against the license: Sept 10, 2010

Type of action taken against the license: Warning with Stipulations and fine

*Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.*

During his license renewal, he answered “no” to the question about any criminal charges, pending or resolved. He had in fact been charged with a Class B Misdemeanor. He then answered no to the same question on his next renewal even though he had entered a guilty plea, claiming his attorney had told him he had informed the BON of the plea etc.

*Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.*

Answer the question honestly. If you aren't sure how to answer a question, ask your attorney if you have one or contact someone at the Board of Nursing and clarify with them what would constitute a “yes” answer to that or any other question you have uncertainty about.

*Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.*

N/A. Though the nurse is required to work with supervision for a number of years and take some educational classes. I assume the supervision is due to the nature of the criminal charge (indecent exposure), though obviously some decision-making skills are lacking, so ensuring patient safety through supervision until it is demonstrated that his critical thinking skills have improved is also appropriate in my opinion.
