

Covenant School of Nursing

Disciplinary Action Summary Assignment

Instructional Module 2

Student Name: Date: DAS Assignment # ____1____ (1-4)

Name of the defendant: Derecia Remeiko Anderson License number of the defendant: 830013

Date action was taken against the license: February 11, 2020

Type of action taken against the license: Revoked

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

The nurse in question was charged with lying and falsifying documentation on hours the nurse saw patients. These patients either were seen for different hours than listed or were never seen at all.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.

Measures that could have prevented action being taken would ultimately have been up to the integrity of the nurse in question. It may be possible to have better management of the nurses hours that require verification that the hours were accurate. It is possible the nurse saw the patients and didn't lie about treatment given but lied about hours due to having forgotten to enter them. This action would have been prevented in this scenario if the nurse had come forward with their documentation mistake instead of falsifying the record.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

The prudent nurse would report the falsifying of records to protect the patients.
