Disciplinary Action Summary Assignment

Instructional Module 2

Student Name: Elizabeth Orosco Date: 5/18/2021 DAS Assignment # 4 (1-4)

Name of the defendant: Yia Vue License number of the defendant: 772247

Date action was taken against the license: 2/14/2017

Type of action taken against the license: Warning with Stipulations

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

- 1.) Failed to notify physician: Patient fell during respondents care and the respondent failed to let the physician know.
- 2.) Exposure to unnecessary risk: Respondent did not take precaution measures to prevent the patient's fall and deprived the patient from medical interventions that could have prevented death.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.

- 1.) The respondent should have took precaution measures to prevent the patients fall. The respondent should have acted and done something about the patients head pain. Also, the respondent should have let the physician know what had happened to the patient and should have alerted to let the physician know that there was a hypotensive episode before the fall. However, the respondent did nothing regarding this incident. Lastly, the respondent should have kept checking the patient's vital signs as well.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

- 1.) The prudent nurse would have alerted the charge nurse/nurse manager/physician regarding the fall that way there would have been immediate action on this unfortunate incident that could have prevented the patient's death.
