

Brittany Long

Adm on 5/19/2021
 Date of birth 12/10/2015
 Age 5
 Gender Female
 Diagnosis Sickle cell anemia

Your main opportunities for improvement

- ✕ You should have assessed the pain level using the FACES scale.
- ✕ You should have asked the relative about any known health problems.
- ✕ Consider providing education to relatives whenever possible.

Basic view

Detailed view

Simulation time: 23:36 Mins

- You introduced yourself.
- 0027 You washed your hands. To maintain patient safety, it is important to wash your hands as soon as you enter the room.
 - 0144 You identified the child. To maintain patient safety, it is important that you quickly identify the child.
 - 0252 You identified the relatives. This is important, as the patient is below 18 years of age.
 - 0412 You obtained legal consent from the child's relative. This was reasonable.
 - 0527 You obtained legal consent from the child's relative. This was reasonable.
 - 0832 You examined the child's legs. The right lower leg is warm to the touch. There is normal elasticity of the skin. She looks slightly pale, and her skin is cool. 
 - 0904 You looked for normal breathing. She is breathing at 24 breaths per minute. The chest is moving equally. 
 - 1127 You attached the pulse oximeter. This was indicated by order.
 - 1156 You attached the automatic noninvasive blood pressure (NIBP) measurement cuff. This will allow you to reassess the child continuously.
