

Covenant School of Nursing
Disciplinary Action Summary Assignment
Instructional Module 2

Student Name: Briana D. Quezada Date: 05/17/2021 DAS Assignment # _3_ (1-4)

Name of the defendant: Margo Michelle Carr License number of the defendant: 773415

Date action was taken against the license: 05/30/2017

Type of action taken against the license: Remedial Education with a Fine.

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

HIPPA violation. Carr inappropriately shared photos of the patient in the operating room through text message.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.

What could have prevented this violation is to not use cellular device or electronics for personal use around patients. Electronics used by faculty around patients should only be used for educational or informational purposes. Patients' confidentiality should always be respected.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

I would talk with the person in private that what they've done is not moral and a violation. I would also report it to the charge nurse and the manager nurse. This kind of act that can be prevented is exposing the patient and could cause harm to the patient.
