

## Proctored Math Examination

Each IM8 student will complete a Dosage Calculation Assessment. The exam is comprised of **20 questions**. Each students have **1-hour** to complete the examination. The score from the first attempt will be entered into the course gradebook and **represent 5%** of the final score grade. In addition, students are required to achieve a **score of 85%** or higher. Students will have a **total of 3 attempts** to meet the 85% requirement. If a second or third attempt is needed, it is the student's responsibility to schedule this time. Retakes must not interfere with clinical or classroom time. If the third attempt is completed prior to the grace period withdrawal date and a student is unsuccessful, the student may withdrawal without academic penalty. Failure to meet the required 85% after the third attempt and after the withdrawal date will result in course failure. (09/18)
